

Molina Complete Care of AZ (MCC) has partnered with CVS Health to offer prescribing providers real-time prescription benefits information via the Real Time Benefit Check tool. Using this tool can help your practice decrease frustration for patients at the pharmacy counter, and build efficiency through increased submission of electronic prior authorization requests.

This service is free of charge to you and can be accessed through your electronic health records. Below are some additional benefits to using the Real Time Benefit Check tool.

Real-Time Prescription Benefits Information at the Point of Care

Get more affordable, covered medications to your patients faster. When you write a prescription using your electronic health record (EHR) system, for each individual patient you can instantly:

Know if the drug is covered and the patient's out-of-pocket cost (if applicable)

See up to five clinically appropriate brand or generic alternatives

Know if a therapy requires prior authorization (PA) or has other restrictions

Find out if your EHR is enabled for real-time prescription benefits.

See other side for details.

The following systems are providing real-time prescription benefits. There's no charge for the service; however, you will need the latest version of your EHR.

Don't see your EHR vendor listed?

Contact your EHR vendor or your EHR system administrator to ensure real-time prescription benefits information will be included in your next upgrade. For Epic users, contact your Epic account manager to confirm your 2019 upgrade go-live date and determine whether additional interfaces are needed.

Having trouble accessing real-time benefits information in your EHR?

Contact your EHR vendor or your EHR system administrator.

If you have questions about the real-time benefits tool and training, please contact your EHR vendor.
If you have questions about this communication or any other item, please contact MCC at: (800) 424-5891

Thank you for your continued care to our members!
