

# Provider Newsletter

FOR MOLINA HEALTHCARE PROVIDERS

## In this issue

- 1** Claims submission
- 2** Drug coverage change
- 9** Requirements for prior authorization submission
- 10** Council for Affordable Quality Healthcare
- 12** Encourage your patients to use My Health Perks
- 13** Our gift to our providers: PsychHub subscription
- 14** Clinical policy updates from the fourth quarter
- 16** Dementia Care Aware: Early detection – better care

## Claims submission

Molina Healthcare strongly encourages providers to submit their claims electronically – including secondary ones when a member has an alternative primary insurance. Electronic claims submission provides significant benefits to the provider, including:

- Reducing operational costs associated with paper claims (printing, postage, etc.)
- Increasing accuracy of data and efficient information delivery
- Reducing claim delays since errors can be corrected and resubmitted electronically
- Eliminating the delay in mailing

Molina offers the option to directly submit claims electronically to us via the Availity Essentials provider portal or your Electronic Data Interchange (EDI) clearing house.

If electronic claims submission is not possible, please submit paper claims to the following address:

Molina Healthcare of California, Inc.  
PO Box 22702  
Long Beach, CA 90801

### When submitting paper claims:

- Submissions are not considered “accepted” until received at the appropriate claims PO Box.
- If claims are sent to the wrong PO Box, they will be returned for appropriate submission.
- Submissions are required on original red and white CMS-1500 and CMS-1450 (UB-04) claim forms.
- Claims will be rejected and returned if the submission is not completed on the required forms. This includes black and white forms, copied forms and any altering – including handwritten claims.
- Claims must be typed using black ink in either 10- or 12-point Times New Roman font.

For more information, please see Centers for Medicare & Medicaid Services (CMS) claims submission guidance at [cms.gov/medicare/billing/electronicbillingEDltrans/1500](https://www.cms.gov/medicare/billing/electronicbillingEDltrans/1500).

## Drug coverage change

### Updated 2024 Part B Step Therapy Grid

Molina has updated medical Part B drug injectable (HCPCS codes) Step Therapy requirements. They are online at [Pharmacy and Prescription Benefits | Medicare \(MolinaHealthcare.com\)](https://www.molinahealthcare.com). Step Therapy is buy and bill medications, provided from the physician/facility stock and administered in the office/facility. The preferred drug list (Step Therapy) is a list of medications that Molina requires the provider to use before a non-preferred. If there is a medical reason why the preferred medicines cannot be used, Molina can approve a non-preferred with a prior authorization, regardless of whether it is buy or bill.

Part B Step Therapy requirements only apply to new therapy – existing therapies will not require Step Therapy utilization.

### Medicare 2024 formulary removals and alternatives

Significant formulary changes for 2024 are summarized, along with covered formulary alternatives, on the next page. Full formularies can be found online at [MolinaHealthcare.com](https://www.molinahealthcare.com).

Drug and drug class	Formulary alternatives
<b>Antilipemics</b>	
PRALUENT®	Repatha®
<b>Antidepressants</b>	
VIIBRYD® starter kit	vilazodone tabs (generic for VIIBRYD®)
Auvelity™	bupropion, bupropion SR, or bupropion XL
<b>Diabetes</b>	
Levemir®	BASAGLAR®, LANTUS®, Tresiba®, Toujeo®
NovoLog®	Fiasp, Admelog (biosimilar to Novolog and Humalog)
Victoza®	Trulicity®, BYETTA®, Ozempic®, Bydureon®, RYBELSUS®
<b>Pulmonary agents</b>	
ADVAIR DISKUS/HFA	Fluticasone/salmeterol, WIXELA INHUB®, BREO, ADVAIR HFA, DULERA®
FLOVENT DISKUS/HFA	ARNUITY ELLIPTA
PULMICORT®	ARNUITY ELLIPTA
SYMBICORT®	Fluticasone/salmeterol, WIXELA INHUB®, BREO, ADVAIR HFA, DULERA®

# Consumer Assessment of Healthcare Providers and Systems (CAHPS®)

The Consumer Assessment of Healthcare Providers and Systems (CAHPS®) is an industry-standard survey tool used to evaluate patient satisfaction. Improving patient satisfaction has many benefits. It not only helps to increase patient retention, but can also help increase compliance with physician recommendations and improve patient outcomes.

Focusing together on a positive patient experience will have many important benefits to your practice:

- Increase patient retention
- Increase compliance with physician clinical recommendations
- Improve patient's overall wellness and health outcomes
- Ensure preventive care needs are addressed more timely
- Reduce no-show rates

Additional resources are available for office staff and patients:

- For additional after-hours coverage, Molina members can call the 24-hour Nurse Advice Line
- Molina members can access Interpreter Services at no cost by calling Member Services
- Providers can access the Provider Web Portal at [MolinaHealthcare.com](https://MolinaHealthcare.com) to:
  - Search for patients and check member eligibility
  - Submit service request authorizations and/or claims and check status
  - Review Patient Care Plan
  - Obtain CAHPS® Tip Sheets
- Participate in online Cultural Competency trainings (also available at [MolinaHealthcare.com](https://MolinaHealthcare.com))

Please encourage your patients who have received the CAHPS® survey to participate. Listed below are several questions asked in the survey regarding patient care:

- When you needed care right away, how often did you get care as soon as you needed?
- When you made an appointment for a check-up or routine care at a doctor's office or clinic, how often did you get an appointment as soon as you needed?
- How often was it easy to get the care, tests, and treatment you needed?
- How often did your personal doctor listen carefully to you?
- How often did your personal doctor spend enough time with you?
- How often did your personal doctor explain things in a way that was easy for you to understand?
- How often did you and your personal doctor talk about all the prescription medicines you were taking?
- How would you rate your personal doctor?

# Molina's 2023 Quality Improvement Results

Molina conducts an annual program evaluation to assess how well we meet the performance goals and objectives for improving the quality and safety of clinical care and services specified within the Quality Improvement Program Description and annual Work Plan. Below are highlights from the annual evaluation.

## CAHPS®

The Consumer Assessment of Healthcare Providers and Systems (CAHPS®)/Marketplace Qualified Health Plan (QHP) Enrollee Experience Survey assesses Molina members' satisfaction with their health care. It allows us to better serve our members.

Molina has received the CAHPS®/QHP results of how our members rated our providers and our services.

**Medicaid:** In 2023, Molina improved in Getting Needed Care and Rating of Health Plan.

We need to make improvements in Getting Care Quickly, Rating of All Health Care and Rating of Personal Doctor.

In 2022, Molina reported 'NA' (i.e., less than 30 members in the denominator) for Coordination of Care and Rating of Specialist Seen Most Often. This limited Molina's ability to make direct comparisons with the 2023 ratings.

**Marketplace:** In 2023, Molina improved in Access to Care, Access to Information, Coordination of Care, Customer Service, and Rating of Specialist Seen Most Often.

We need to make improvements in Annual Flu Vaccine (Adults 18-64), Medical Assistance with Smoking and Tobacco Use Cessation, Rating of Health Plan, Rating of All Health Care, and Rating of Personal Doctor

**Medicare:** In 2023, Molina improved in Getting Care Quickly.

We need to make improvements in Getting Needed Care, Customer Service, Rating of Health Plan Rating of All Health Care, Rating of Drug Plan and Annual Flu Vaccine.

For both 2022 and 2023, Molina reported 'NA' (i.e., less than 30 members in the denominator) for Coordination of Care and Getting Needed Prescription Drugs; no comparison can be made.

## HEDIS®

Another tool used to improve member care is the Healthcare Effectiveness Data and Information Set or HEDIS®. HEDIS® scores allow Molina to monitor how many members are receiving the services they need. Measures include immunizations, well-child exams, Pap tests and mammograms. There are also scores for diabetes care, and prenatal and after-delivery care.

**Medicaid:** In 2023, Molina improved in Antidepressant Medication Management (AMM) Effective Continuation Phase Treatment, Appropriate Testing for Pharyngitis (CWP), Appropriate Treatment for Upper Respiratory Infection (URI), Asthma Medication Ratio – Total (AMR), Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB), Blood Pressure Control (<140/90) for Patients With Diabetes (BPD), Breast Cancer Screening (BCS), Controlling High Blood Pressure (CBP), Eye Exam for Patients With Diabetes (EED), Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse or Dependence - 7-Day Follow-Up Total (FUA), Follow-Up After Emergency Department Visit for Mental Illness - 7-Day Follow-Up Total (FUM), Follow-Up After High-Intensity Care for Substance Use Disorder - 7-Day Follow-Up Total (FUI), Follow-Up for Children Prescribed ADHD Medication - Continuation and Maintenance Phase (ADD), Hemoglobin A1c Control for Patients With Diabetes - HbA1c Control (<8%) (HBD), Initiation and Engagement of Alcohol and Other Drug Dependence Treatment - Engagement of AOD Treatment Total (IET), Metabolic Monitoring for Children and Adolescents on Antipsychotics - Blood Glucose and Cholesterol Testing Total (APM), Pharmacotherapy for Opioid Use Disorder Total (POD), Pharmacotherapy Management of COPD Exacerbation - Systemic Corticosteroids (PCE), Plan All-Cause Readmissions - Observed-to-Expected Ratio 18-64 Years (PCR), Prenatal and Postpartum Care - Postpartum Care (PPC), Use of Opioids at High Dosage (HDO), Use of Opioids from Multiple Providers - Multiple Prescribers and Multiple Pharmacies (UOP), Statin Therapy for Patients with Cardiovascular Disease - Statin Adherence 80% Total (SPC), and Statin Therapy for Patients with Diabetes - Statin Adherence 80% (SPD).

We need to make improvements in Adherence to Antipsychotic Medications for Individuals with Schizophrenia (SAA), Cervical Cancer Screening (CCS), Childhood Immunization Status - Combination #10 (CIS), Chlamydia Screening in Women Total (CHL), Diabetes Screening for People with Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD), Immunizations for Adolescents - Combination #2 (IMA), Risk of Continued Opioid Use - 31-Day Total (COU), Kidney Health Evaluation for Patients with Diabetes (KED), Pharmacotherapy Management of COPD Exacerbation - Bronchodilator (PCE), Prenatal and Postpartum Care - Timeliness of Prenatal Care (PPC), Prenatal Immunization Status - Combination Rate (PRS), Statin Therapy for Patients with Cardiovascular Disease - Received Statin Therapy Total (SPC), Statin Therapy for Patients with Diabetes (SPD), Use of Imaging Studies for Low Back Pain (LBP), and Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents - BMI Percentile (WCC).

In 2022, Molina reported 'NA' (i.e., less than 30 members in the denominator) for the measure Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics Total (APP) and 'NB' (i.e., No Benefit) for the measure Follow-Up After Hospitalization for Mental Illness - 7-Day Follow-Up Total (FUH). This limited Molina's ability to make direct comparisons with the 2023 ratings.

For both 2022 and 2023, Molina reported 'NB' (i.e., No Benefit) for the measure Annual Dental Visits (ADV); no comparison can be made.

**Marketplace:** In 2023, Molina improved in Annual Dental Visit (ADV), Antidepressant Medication Management - Effective Acute Phase Treatment (AMM), Antidepressant Medication Management - Effective Continuation Phase Treatment (AMM), Appropriate Testing for Pharyngitis (CWP), Appropriate Treatment for Upper Respiratory Infection (URI), Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB), Breast Cancer Screening (BCS), Cervical Cancer Screening (CCS), Chlamydia Screening in Women (CHL) Total, Eye Exam for Patients With Diabetes (EED), Prenatal and Postpartum Care - Timeliness of Prenatal Care (PPC), Prenatal and Postpartum Care - Postpartum Care (PPC), Proportion of Days Covered - RAS Antagonists (PDC), Proportion of Days Covered - Diabetes All Class (PDC), Proportion of Days Covered - Statins (PDC), Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents - Counseling for Nutrition Total (WCC), and Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents - Counseling for Physical Activity Total (WCC), and Child and Adolescent Well-Care Visits Total (WCV).

We need to make improvements in Annual Monitoring for Persons on Long-term Opioid Therapy (AMO), Plan All-Cause Readmission (PCR), Asthma Medication Ratio (AMR), Childhood Immunization Status - Combination #10 Total (CIS), Colorectal Cancer Screening (COL), Controlling High Blood Pressure (CBP), Follow-Up After Hospitalization for Mental Illness - 30 Day Follow-Up Total (FUH), Follow-Up After Hospitalization for Mental Illness - 7 Day Follow-Up Total (FUH), Hemoglobin A1c Control for Patients With Diabetes (HBD), Initiation and Engagement of Substance Use Disorder Treatment - Initiation of SUD Treatment Total (IET), Initiation and Engagement of Substance Use Disorder Treatment - Engagement of SUD Treatment Total (IET), Immunizations for Adolescents - Combination #2 Total (IMA), International Normalized Ratio Monitoring for Individuals on Warfarin (INR), Use of Imaging Studies for Low Back Pain (LBP), and Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents - BMI Percentile Total (WCC).

In 2022, Molina reported 'NA' (i.e., less than 30 members in the denominator) for the measure Well-Child Visits in the First 30 Months of Life - First 15-30 Months (W30), and the measure Kidney Health Evaluation for Patients With Diabetes (KED) was 'Not Reported.' This limited Molina's ability to make direct comparisons with the 2023 ratings.

For both 2022 and 2023, Molina reported 'NA' (i.e., less than 30 members in the denominator) for the measure Well-Child Visits in the First 30 Months of Life - First 15 Months (W30); no comparison can be made.

**Medicare:** In 2023, Molina improved in Breast Cancer Screening (BCS), Care for Older Adults - Medication Review (COA), Care for Older Adults - Pain Screening (COA), Colorectal Cancer Screening (COL), and Diabetes Care - Eye Exam (EED).

We need to make improvements in Controlling Blood Pressure (CBP), Diabetes Care Blood Sugar Controlled (HBD), Medication Reconciliation Post-Discharge (TRC), and Statin Therapy for Patients with Cardiovascular Disease - Received Statin Therapy Total (SPC).

For both 2022 and 2023, Molina reported 'NA' (i.e., less than 30 members in the denominator) for the measure Osteoporosis Management in Women Who Had a Fracture (OMW); no comparison can be made.

The progress related to the goals that Molina Healthcare of California has set for the annual CAHPS®/QHP survey results and the annual HEDIS® measures can be viewed in more detail on the Molina Website. You can also view information about the Quality Improvement Program and print a copy if you would like one. Please visit the provider page on Molina's website at [MolinaHealthcare.com](https://www.MolinaHealthcare.com).

# Requirements for prior authorization submission

Molina has partnered with MCG Health to offer Cite AutoAuth self-service for advanced imaging prior authorization (PA) requests.

## What is Cite AutoAuth, and how does it work?

Providers can receive an expedited – often immediate – response by attaching the relevant care guideline content to each PA request and sending it directly to us. Through a customized rules engine, Cite AutoAuth matches Molina’s specific criteria to the clinical information and attached guideline content to potentially authorize the procedure automatically.

Self-services available in the Cite AutoAuth tool include, but are not limited to:

- MRIs
- CTs
- PET scans

If you want to see the complete list of imaging codes requiring PA, you can refer to the PA Code LookUp Tool online at [MolinaHealthcare.com](https://MolinaHealthcare.com).

## How to access and learn more

Cite AutoAuth can be accessed online via the Availity Essentials provider portal at [provider.MolinaHealthcare.com](https://provider.MolinaHealthcare.com) in **Molina’s Payer Spaces**. It is available 24 hours per day, seven days per week.

This submission method is strongly encouraged as your primary submission route. However, existing fax/phone/email processes are also available.

Additional information about Cite AutoAuth is available in the quick reference guide on Medicaid:

[MolinaHealthcare.com/-/media/Molina/PublicWebsite/PDF/Providers/ca/Medicaid/Resources-and-Training/MCG-Cite-AutoAuth-Provider-Access-QRG.ashx](https://MolinaHealthcare.com/-/media/Molina/PublicWebsite/PDF/Providers/ca/Medicaid/Resources-and-Training/MCG-Cite-AutoAuth-Provider-Access-QRG.ashx)

Medicare:

# Council for Affordable Quality Healthcare

## What is the Council for Affordable Quality Healthcare?

Council for Affordable Quality Healthcare (CAQH) technology-enabled solutions eliminate redundant and inefficient administrative processes between health plans and providers for credentialing, directory maintenance, coordination of benefits and other essential business functions. CAQH offers options to reduce the administrative burden for providers.

## How does Molina use CAQH?

Molina uses the CAQH DirectAssure application to allow enrolled providers to attest and update their data in a single place shared by all companies contracted with and utilizing CAQH. Molina registers all of our non-delegated credentialed providers for CAQH DirectAssure and currently pays the monthly fees related to the attestation tools for the providers.

## What are the benefits of using CAQH?

- **Decreased administrative burden:** CAQH provides a tool to facilitate providers meeting the requirement to attest to their demographics and key information on record with Molina every 90 days.
- **Increased Molina support:** As providers update their information in CAQH, we can systemically update our system, enabling our associates to assist providers with other needs.
- **More accurate records:** By obtaining more frequent provider updates, we'll have precise provider information for our records.

## How does CAQH work for providers?

Providers enter updated information once in CAQH, which is shared with multiple entities utilizing the CAQH DirectAssure application. This simplifies the providers' administration work and reduces the need to track changes. The No Surprises Act (NSA) requires providers to attest to their data every 90 days. CAQH provides an effective way to meet that requirement.

## What's next?

Molina is working with providers to encourage CAQH attestation. You may use other credentialing tools mandated by your state's regulatory agencies, but CAQH offers many other features and benefits beyond credentialing attestations.

We're excited to continue improving our automation of provider information processes to reduce the administrative burden on providers to update data.

## Availity Essentials is Molina Healthcare's exclusive provider portal

Availity Essentials is Molina Healthcare's official, secure provider portal for traditional (non-atypical) providers (i.e., personal care, adult day care, taxi services or home modifications). Some core features available in Availity Essentials for Molina include eligibility and benefits, attachments, claim status, Smart Claims and Payer Space (submit and check prior authorizations and appeal status and appeal/dispute).

Several new features and enhancements have recently been added to Availity Essentials for Molina providers. If you missed it, check out the latest enhancements to simplify workflows and reduce administrative burden!

What's new?	How does it benefit me?
Appeals	Submit your appeal and dispute requests online for Molina's finalized claims. Check the status of your requests submitted on Availity Essentials. View and import requests initiated through outside channels (mail, fax, etc.) and complete them within your Availity Essentials workflow. Upload supporting documentation for online requests. Receive a notification when requests have been finalized and processed by Molina.
Claims corrections	Molina providers can now access a new claims correction feature from the claim status page. Claims correction allows you to correct and resubmit a paid or denied claim from the claim status response page.
Overpayments	Eliminate mail and fax for faster dispute resolution and ensure overpayment requests are current. View the status and details of any claim Molina has identified as an overpayment. Request additional information, dispute or resolve the overpayment.
Patient search	Save time entering patient information for eligibility and benefits inquiries. Enter the patient's member ID or their last name, first name and date of birth (DOB), then select the patient matching the criteria. The information will automatically populate on the request.
Molina Medicare is now included in the Molina Healthcare Payer Option.	Select only one option in the payer field. The <b>Molina Medicare</b> option no longer displays in the payer field. When you select the <b>Molina Healthcare</b> option for the region, the plan coverage for the member includes Dual-Eligible, Marketplace, Medicare and Medicaid.

## Not registered with Availity Essentials?

If your organization is not yet registered for Availity Essentials and you're responsible for the registration, please visit [availity.com/MolinaHealthcare](https://www.availity.com/MolinaHealthcare) and click **Register**.

Call Availity Essentials Client Services at **(800) AVAILITY (282-4548)** for registration issues. Assistance is available Monday-Friday from 8 a.m. to 8 p.m. ET.

## Dive deeper into Availity Essentials

Once you have your Availity Essentials account, you can learn more about the features and functionality offered to Molina providers. Log in -> go to **Help & Training** -> **Get Trained** to register for a webinar.

## Encourage your patients to use My Health Perks

### Back for 2024 – the My Health Perks program

Molina Marketplace subscribers and dependents 18 years and older are eligible for our health and wellness program – My Health Perks. The program provides access to interactive disease management programs and healthy lifestyle information. All eligible members will have the opportunity to earn a **\$100 gift card** by completing both of the following activities:

- A preventive wellness examination with their primary care provider.
- The My Health Perks wellness assessment via the My Wellness tab on the My Molina® member portal.

Eligible members who complete both incentivized activities will be notified via email and within the My Molina member portal to select a physical or digital gift card. Please encourage members to learn more about the My Health Perks program online via the **My Wellness** tab in their member portal. Members can also contact Member Services for additional information.

# Our gift to our providers: PsychHub subscription!

Molina has partnered with PsychHub to offer our valued network providers a no-cost subscription to the PsychHub platform.

PsychHub is an online digital behavioral health education platform that providers can access PsychHub's online learning courses. Some of these courses offer continuing education opportunities for select licensures. Various learning courses – including the Mental Health Ally Certification Program – may benefit office staff and/or providers interested in learning more about working with the behavioral health population.

Ready to get started? Molina network providers can access this and other courses that offer continuing education units (CEUs) on the PsychHub platform by clicking the following link and simply creating an account:

[app.psychhub.com/signup/molina-mhp/](https://app.psychhub.com/signup/molina-mhp/)

Contact your Provider Services representative to set up an overview of the PsychHub platform and its resources.

# Clinical policy updates from the fourth quarter 2023

Molina Clinical Policies (MCPs) are located at [MolinaClinicalPolicy.com](https://www.molinahealthcare.com/clinical-policy). The policies are used by providers, medical directors and internal reviewers to make medical necessity determinations. MCPs are reviewed annually and approved bimonthly by the Molina Clinical Policy Committee (MCPC).

## The following new policies were approved:

- MCP-447: Casgevy (exagamglogene autotemcel)
- MCP-443: Fractional Laser Treatment of Traumatic and Burn Scars
- MCP-444: Implantable Peripheral Nerve and Nerve Field Stimulators for Chronic Pain
- MCP-445: Speech Generating Devices
- MCP-448: Lyfgenia (lovotibeglogene autotemcel)
- MCP-446: Wheelchair-Mounted Robotic Arm Devices

## The following policies have coding updates only:

- MCP-436: Elevidys
- MCP-422: Neuromuscular Electrical Training for the Treatment of Obstructive Sleep Apnea or Snoring (eXciteOSA)
- MCP-433: Roctavian
- MCP-357: Skin Substitutes

## The following policies were revised:

- MCP-406: Enteral Nutrition
  - Coverage indications updated to include chronic indications.
- MCP-245: Heart Transplantation with a Total Artificial Heart
- MCP-117: Small Bowel Multivisceral Transplantation
- MCP-114: Liver Transplantation (Adult and Pediatric)
  - The above transplant policies were updated as follows: Age for colonoscopy reduced to 45 years, added active pregnancy to absolute contraindications, updated active substance abuse contraindication to include potential requirement for formal substance use disorder evaluation.
- MCP-115: Lung Transplantation
  - Removed rapid fall in forced expiratory volume in one second (FEV1) in the presence of cystic fibrosis as an indication, added other end-stage lung disease as a potential indication for transplant, age for colonoscopy reduced to 45 years, updated active substance abuse contraindication to include potential requirement for formal substance use disorder evaluation.
- MCP-272: Hematopoietic Stem Cell Transplantation for Ewings Sarcoma
- MCP-194: Hematopoietic Stem Cell Transplantation for Germ Cell Tumors
- MCP-265: Hematopoietic Stem Cell Transplantation for Immunodeficiency Disorders
- MCP-193: Hematopoietic Stem Cell Transplantation for Neuroblastoma

- MCP-324: Hematopoietic Stem Cell Transplantation for Primary Myelofibrosis
- MCP-209: Hematopoietic Stem Cell Transplantation for Sickle Cell Anemia
  - The above transplant policies were updated as follows: Age for colonoscopy reduced to 45 years, updated active substance abuse contraindication to include potential requirement for formal substance use disorder evaluation.
- MCP-309: Hematopoietic Stem Cell Transplantation for Myelodysplastic Syndromes (MDS)
  - Age for colonoscopy reduced to 45 years, updated active substance abuse contraindication to include potential requirement for formal substance use disorder evaluation, added Molecular International Prognostic Score System (IPSS-M) score of 1 or more in the presence of other qualifying indications.
- MCP-121: Inhaled Nitric Oxide iNO for Neonatal Hypoxic Respiratory Failure
  - Updated indications to include failed trial of high-frequency jet oscillation and removed oxygenation index requirement.
- MCP-132: Percutaneous Ventricular Assist Devices
  - Coverage indications updated to include contraindications for Impella RP & RP Flex, and Impella therapy used in conjunction with ECMO or IABP. TandemHeart information removed.
- MCP-390: Radiofrequency Ablation (RFA) of the Renal Sympathetic Nerves as a Treatment for Uncontrolled Hypertension
  - Coverage indications updated to cover RFA in the appropriate setting.
- MCP-348: Zolgensma (onasemnogene abeparvovec)
  - Removed reference to SMA clinical subtype as a criterion. Updated to allow four copies of the SMN2 modifier gene to be present for approval. Added new warning from prescribing information about fatalities related to liver failure. Added requirement of recent (within 30 days of request) complete blood count within normal limits.

**The following policies have been retired and are no longer available on the website:**

- MCP-234: Bioimpedance Analysis for Lymphedema Assessment (see MCG)
- MCP-370: Durysta (bimatoprost implant) (see policy under pharmacy)
- MCP-282: Ozurdex (dexamethasone intravitreal implant) (see policy under pharmacy)
- MCP-243: Gastrointestinal Electrical Stimulation GES for Obesity (see policy 414)
- MCP-392: Monarch External Trigeminal Nerve Stimulation eTNS System (see MCG)
- MCP-391: Radiofrequency Ablation of Primary or Metastatic Liver Tumors (see MCG)
- MCP-134: Therapeutic Apheresis (see MCG)

## Provider Manual updates

The Provider Manual is customarily updated annually but may be updated more frequently as needed.

## Dementia Care Aware: Early detection – better care

A critical step in meeting the needs of the growing aging population is early recognition of cognitive decline. By 2040, the number of Californians aged 65 and older living with Alzheimer's disease is expected to more than double. Californians who live to be 65 or older have a one in five chance of developing dementia.

Dementia Care Aware is a training and support program led by the California Department of Health Care Services and the University of California, San Francisco. The program empowers primary care providers and their teams to assess and address dementia early.

Dementia Care Aware includes training on the **Cognitive Health Assessment** – a five to 10-minute screening that can fit into several types of visits – including routine visits, the Medicare annual wellness visit (AWV) and during the Health Risk Assessments – and can satisfy the required AWV cognitive impairment screening. By detecting dementia early, providers may be able to help reduce the administrative burden for their offices and increase positive health outcomes for individuals living with dementia and their caregivers. Some providers may also receive a \$29 payment for screening certain Medi-Cal patients for dementia after completing the training. The Cognitive Health Assessment training is offered as an **online course** and as **monthly virtual training webinars**. Providers who complete it are eligible to receive continuing education credits.

In addition, Dementia Care Aware provides supplementary training on important topics and resources for evaluation and care planning with patients – including tools for implementing dementia detection and care in clinical practice and connecting patients and care partners to community resources.

Learn more about Dementia Care Aware at [DementiaCareAware.org](https://DementiaCareAware.org). For questions or to request training, please email [DCA@ucsf.edu](mailto:DCA@ucsf.edu).
