Prior authorization (PA) is required for non-preferred baclofen dosage formulations. Payment for a non-preferred agent will be considered only for cases in which there is documentation of a previous trial and therapy failure with a preferred agent. Payment will be considered under the following conditions:

- 1) Patient has a diagnosis of spasticity resulting from multiple sclerosis (relief of flexor spasms and concomitant pain, clonus, and muscular rigidity) or spinal cord injuries/diseases; and
- 2) Patient meets the FDA approved age; and
- 3) Documentation of a patient-specific, clinically significant reason (beyond convenience) why the member cannot use baclofen oral tablets, even when tablets are crushed and sprinkled on soft food or liquid. Presence of a nasogastric (NG) tube/J-tube alone are not reasons for approval; and
- 4) Request does not exceed the maximum dosage of 80mg daily.

IMPORTANT NOTE: In evaluating requests for prior authorization the consultant will consider the treatment from the standpoint of medical necessity only. If approval of this request is granted, this does not indicate that the member continues to be eligible for Medicaid. It is the responsibility of the provider who initiates the request for prior authorization to establish by inspection of the member's Medicaid eligibility card and, if necessary by contact with the county Department of Health and Human Services, that the member continues to be eligible for Medicaid.
