---------------------------------------	-------------------	---------------------------------

Specialties (e.g., working with autism, the elderly, employment for people with disabilities or youth in transition, mental health, experience with assisted technology)

Prior to coming to TMG, I worked as a program coordinator for an adult day program. I also worked for a long-term integrated care program where I gained experience working with older adults and individuals with physical disabilities and mental health issues.

County/Region I'm familiar with

Milwaukee, Waukesha

Languages or Communication Skills

English

I'm comfortable with pets in the home

Yes

More about me

How do you Partner with people to 'clear the path ahead'?

Partnering with an individual is getting to know you and what your future goals are. We then create a plan you feel comfortable with in order to achieve them. We work together to identify services or natural supports available to you. We discuss your IRIS budget and resources you need to get the care and support necessary to achieve those important goals.

What's your favorite thing about being an IRIS consultant?

My favorite thing about being an IRIS Consultant is empowering people to create meaningful lives in their communities. Helping people get the most out of life is a wonderful accomplishment and makes me feel like I made a difference in one's life. It becomes very rewarding when an individual achieves their goals.

What past experience prepared you to become an IRIS Consultant?

I have worked in the health care field for many years and believe my past experiences have encouraged me to get involved in a long-term care program so I can help others, make a difference in their lives and it has given me the abilities to be the IRIS Consultant I am today.

What do you enjoy doing in your free time?

I enjoy spending time with my three children and 5-year-old golden retriever. I am a huge animal lover, enjoy the outdoors, and love to travel. I also participate in fundraising activities to support finding cures for fatal diseases. I also have a deep compassion for the ALS (Lou Gehrig's Disease) association.
